YAVI MEDICAL SOLUTIONS

CATALOGUE 2027

FOR VET CLINICS

YAVI VET

Veterinary sutures for Ontario clinics

Packs shown are design renders. Final packs may differ.

10 codes

Polyglactin 910, PDO, poliglecaprone, PGA and nylon, in the sizes clinics use most

Backorder help

Backordered with your usual supplier? Call us and we will do our best to help

No minimum order

One box or fifty, one monthly invoice

FOR VETERINARY USE ONLY

Sales and visits: Vidhi Pandya (905) 921-2547
Orders: Yakshkumar Patel (647) 482-2171
sales@yavimedicalsolutions.com · yavimedicalsolutions.ca

THE RANGE

Sterile sutures, box of 12

Most codes use the same needle: 24 mm, 3/8 circle, reverse cutting (made for skin and tough tissue), on 70 cm of synthetic thread.

Packs shown are design renders. Final packs may differ.

ABSORBABLE · VIOLET

Polyglactin 910

Braided. Commonly used for soft tissue and subcutaneous closure.

PG2 · 2-0 **PG3 · 3-0**

Packs shown are design renders. Final packs may differ.

ABSORBABLE · VIOLET

PDO (polydioxanone)

Monofilament. Passes smoothly through tissue and is absorbed more slowly than polyglactin.

PD2 · 2-0 **PD3 · 3-0**

Packs shown are design renders. Final packs may differ.

NON-ABSORBABLE · BLACK

Nylon

Monofilament. Commonly used for skin closure; easy to see and remove.

NY3 · 3-0

THE RANGE, CONTINUED

More codes for your shelf

Four more materials for the jobs your surgeons ask for.

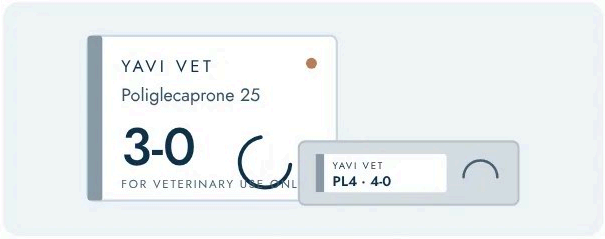

Illustration only. Final packs may differ.

ABSORBABLE · MONOFILAMENT

Poliglecaprone 25

A smooth single strand that loses its strength quickly. Commonly used for subcuticular and finer closures.

PL3 · 3-0 **PL4 · 4-0 · 19 mm needle**

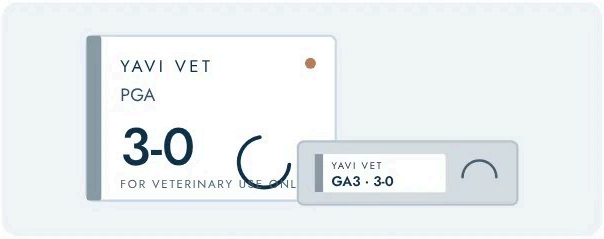

Illustration only. Final packs may differ.

ABSORBABLE · BRAIDED

PGA (polyglycolic acid)

A braided absorbable, close in use to polyglactin 910. Commonly used for soft tissue closure.

GA3 · 3-0

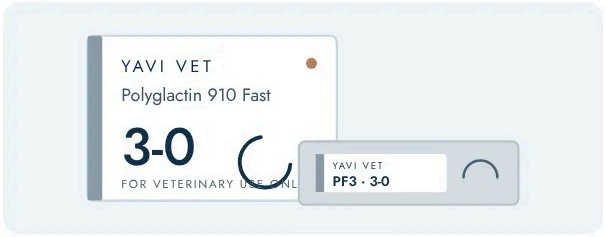

Illustration only. Final packs may differ.

ABSORBABLE · BRAIDED · FAST

Polyglactin 910 Fast

Absorbs faster than standard polyglactin 910. Commonly used where only short support is needed.

PF3 · 3-0

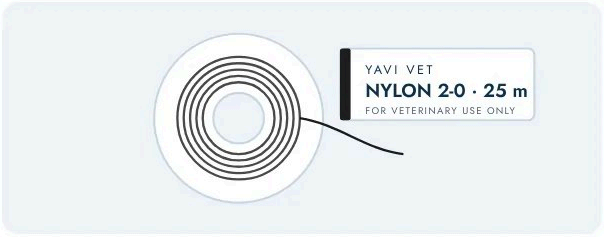

Illustration only. Final packs may differ.

NON-ABSORBABLE · REEL

Nylon cassette

Nylon on a 25 m reel, with no needle. Cut the length you need.

NC2 · 2-0 · 25 m *Pack details to be confirmed*

Full details on any code: ask us or visit yavimedicalsolutions.ca.

SPECS AND QUALITY

What is in every box

Code	Material	Size	Type	Needle	Length
PG2	Polyglactin 910	2-0	Absorbable, braided	24 mm 3/8 RC	70 cm
PG3	Polyglactin 910	3-0	Absorbable, braided	24 mm 3/8 RC	70 cm
PF3	Polyglactin 910 Fast	3-0	Absorbable, braided, fast	24 mm 3/8 RC	70 cm
GA3	PGA	3-0	Absorbable, braided	24 mm 3/8 RC	70 cm
PD2	PDO	2-0	Absorbable, mono	24 mm 3/8 RC	70 cm
PD3	PDO	3-0	Absorbable, mono	24 mm 3/8 RC	70 cm
PL3	Poliglecaprone 25	3-0	Absorbable, mono	24 mm 3/8 RC	70 cm
PL4	Poliglecaprone 25	4-0	Absorbable, mono	19 mm 3/8 RC	70 cm
NY3	Nylon	3-0	Non-absorbable, mono	24 mm 3/8 RC	70 cm
NC2	Nylon cassette	2-0	Non-absorbable, mono	No needle	25 m reel

RC = reverse cutting. Mono = monofilament. All codes except NC2: box of 12, sterile, single use. NC2: one 25 m reel; pack and sterility details to be confirmed.

On every foil and box

"For veterinary use only" on every foil, box and carton
Lot number and expiry date on each foil
Sterilization method on the label and lot certificate

Quality pack, on request

The maker's ISO 13485 certificate
Sterilization certificate for each lot
Certificate of analysis (COA) for each lot
A spec sheet for every code

- We record the lot number of every box we deliver, so if a lot is ever recalled, we can contact the clinics that received it.

QUICK REFERENCE

Which code for which job

Common choices in routine small animal surgery. A guide only: the surgeon makes the final choice.

- **Every YAVI VET code has a reverse-cutting needle** (PL4: 19 mm, the others 24 mm). Laval uses reverse cutting for skin, dermis and fascia, and a taper needle for subcutaneous tissue, muscle and gut, because a cutting edge can damage soft tissue. Need a taper needle? Ask us.

Common choices by tissue

Tissue	Commonly used	Cat	Dog, ~20 kg	Needle	YAVI VET codes
Skin	Nylon	4-0*	Per surgeon	Reverse cutting	**NY3 · NC2**
Intradermal	Absorbable monofilament	–	4-0 or 3-0	Reverse cutting	**PL4 · PL3 · PD3**
Linea alba	PDO, poliglecaprone 25	–	2-0 or 0	Either	**PD2**
Subcutaneous	Poliglecaprone 25, polyglactin 910	4-0	4-0 or 3-0	Taper	*Taper needle: ask us*
Muscle	Polyglactin 910, PGA	4-0	3-0 or 2-0	Taper	*Taper needle: ask us*
Intestine	PDO, poliglecaprone 25	–	4-0 or 3-0	Taper	*Taper needle: ask us*

Based on the suture and needle tables in Université Laval, Faculty of Veterinary Medicine, SOP C-10 (2024). "–" means not listed there. *Nylon 4-0 is not in our range yet.

Materials at a glance

Material	Strand	Support
Polyglactin 910	Braided	Medium
Polyglactin Fast	Braided	Short
PGA	Braided	Medium
Poliglecaprone 25	Single	Short
PDO	Single	Long
Nylon	Single	Stays

Support = how long the thread holds the tissue. Nylon does not absorb and is removed after healing.

Size chart

USP	Metric	Diameter
2-0	3	0.300–0.339 mm
3-0	2	0.200–0.249 mm
4-0	1.5	0.150–0.199 mm

Synthetic sutures, all our materials. More zeros = finer thread.

Good to know

Nylon holds a knot less firmly than braided thread, so one extra throw is common practice.

HOW IT WORKS

Your backup supply room

Keep your main supplier. We help keep your suture shelf stocked and are here when a backorder hits a surgery day.

YAVI Shelf

We agree stock levels with you and help keep your shelf topped up on a schedule that suits your clinic.

Full shelf, calm clinic. Ask any cat.

Backorder help

Short on a code elsewhere? Call us and we will work to get it to you quickly.

We fetch. No treats needed.

Referral thank-you

Know a clinic that could use us? Ask about our referral thank-you.

Word of mouth, or word of paw.

Delivery at your time

Early morning or Sunday? Just ask. We will do our best, depending on your order and the weather.

Early birds welcome.

TRY FIRST

Trial kit for your clinic

Ask us for a trial kit to test our sutures in a few surgeries before you order.

Open an account in 3 steps

1. Call, email or visit yavimedicalsolutions.ca, or ask for a visit.
2. We confirm your clinic on the College of Veterinarians of Ontario register.
3. Place your first order. We will confirm delivery timing with you.

Good to know

Prices: on the loose price sheet, or ask us for a quote.

Delivery: GTA, Durham and nearby by us. Elsewhere in Ontario by courier.

Payment: one monthly invoice. Terms for approved accounts.

Returns: damaged or wrong item? Tell us within 7 days. Unopened packs only.

- Problem with a box or foil? Call or email us with the code and lot number. We record every lot we deliver and will look into it right away.

NOTES

Take a paws.

Lists, reminders, phone numbers, doodles. This page is yours.

Suture shelf check

Code	Suture	Stock	Order
